

Doctors You Should Know

Dentist

Providing Cosmetic and Restorative Dentistry to Patients in the North Shore and the Northwest Suburbs

Dr. Stevan Orser is a highly qualified cosmetic dentist with a passion for creating attractive and healthy smiles that last a lifetime. Dr. Orser provides comprehensive dental care to adults with particular emphasis on cosmetic, bite function and restorative dentistry.

Dr. Orser has achieved the prestigious Accredited Member status with the *American Academy of Cosmetic Dentistry*. This accomplishment is currently held by fewer than 300 dentists worldwide, and is an attestation of his advanced clinical skills.

"If you could wake up tomorrow morning and magically have the perfect smile, how would your life be different?" This is how Dr. Orser begins his consultation with every new patient. He knows that when he is crafting the perfect smile, he is positively impacting his patients' lives. So while his patients love him for his gentleness and humor, they also respect him for the time, attention, and personalized service that he gives to the lives he touches with his artistry and skill.

One of the most compelling testaments to Dr. Orser's talents is the fact that some of his patients are dentists and dental lab technicians, who fly in from all over the country to let him transform their smiles. A teacher and clinical consultant to dentists nationwide, and a practicing dentist for more than 30 years, Dr. Orser believes his greatest accomplishment is that the beautiful smiles he creates are more functional than his patients' original teeth and require less maintenance. This is one of the reasons Dr. Orser's patients trust him with their dental aesthetic needs.

Dr. Orser is committed to delivering beautiful results in the safest, most comfortable manner possible to fulfill the mission of his office — "Help people to feel good about themselves by applying our skills and artistic talents to restoring, maintaining and enhancing their smiles."

Imagine how different your life would be if you were one of Dr. Orser's patients.

Call Dr. Orser today for your complimentary one-hour exam.

Offer includes digital photographs, jaw joint examination, decay and gum disease assessment, bite exam, and a cosmetic consultation.
